JAX at BAL | Week 9 | Projected box score

Thursday Nov 5, 8:15 PM ET | 25,000 simulated games

JAX 25 BAL 16

JAX wins 79% of sims | Big books: JAX -10, total 40.5

How to read: every number is the MEDIAN of 25,000 simulated games (half the sims above, half below).
Avg = average across sims, useful for depth players whose median is 0.
10-90% = range covering the middle 80% of sims.
† = model blind spot: projected and shown, never bet (backup QB passing game, coach role cuts, depth players).
Every skill player with offensive snaps in his team's last 2 games is simulated. Lamar Jackson and Tyler Huntley out.
Projections made 2026-11-03 20:37 UTC.
